

Component 2

Emission inventories

Recommendations for further work

Twinning project - Air Quality Improvement

An EU-funded project managed by the European Agency for Reconstruction

Component 2 Emission inventories

- At the moment the emission inventory work is not on a permanent basis.
- There are skilful national experts ready to carry out the work on air emission inventories when funding is available.
- Using the tools and methods provided by the MS experts the BC experts have already been able to improve and complement the inventories.

Component 2 Emission inventories

Recommendations for further work

- Establishment of the legal framework
- Development of a National System for inventories: appointment of responsible parties, organization of data collection
- **Ensuring resources**

Component 2 Emission inventories
